VORWORT.

Mit dieser Arbeit löse ich endlich die beiden in der Vorrede zur „Classified List“ und in der *Zeitschrift für Assyriologie*, Band III, Seite 412 oben gegebenen Versprechen ein; leider war ich durch äussere Umstände daran verhindert, es früher zu thun.

Für das Wörterverzeichnis verweise ich auf den oben citirten Aufsatz der *Zeitschrift für Assyriologie*¹⁾, in dem ich die Anordnung nach der Zeichenfolge ausführlich beschrieben und begründet habe; die Entscheidung über den praktischen Werth derselben überlasse ich dem Urtheil der Fachgenossen. In einem Punkt bin ich allerdings von den dort aufgestellten Grundsätzen abgewichen; Wörter, die mit voller oder genügender Sicherheit einer Wurzel zuzuweisen sind, habe ich unter dieselbe zusammengestellt, während ich bei den nach der Zeichenordnung eingereihten Wörtern auf die betreffende Wurzel verwiesen habe, also das Gegentheil von dem a. a. O. S. 412 Vorgeschlagenen. Diejenigen Wörter dagegen, deren Wurzeln nicht sicher zu bestimmen sind, habe ich nach der Zeichenordnung eingereiht und unter den muthmasslichen Wurzeln bloss angeführt, indem ich sie durch das Zeichen ¶ kenntlich machte. Je nach den verschiedenen Lesungen stehen sie oft unter mehreren Wurzeln.

Von grossem Vortheil war es mir dass ich das *Handwörterbuch* von DELITZSCH für meine Arbeit benützen konnte. Obgleich ich in vielen Dingen von dem Verfasser

1) Als ich diesen Aufsatz schrieb, wusste ich nicht, dass Herr W. GOLENISCHIEFF die Anordnung des assyrischen Wortschatzes nach der Zeichenordnung in seinem Werke Опытъ графически расположеннаго Ассирійскаго словаря (*Versuch eines nach den Zeichen geordneten assyrischen Wörterbuches*, St. Petersburg 1888), bereits durchgeführt hatte; ich erfuhr es erst durch die Liebenswürdigkeit des genannten Gelehrten, indem er mir ein Exemplar seines Werkes zuschickte. Ihm gebührt also die Priorität in der Einführung des Prinzips.

abweiche, so hat mir dieses vorzügliche Werk bei der Anordnung der Wurzeln ganz ausserordentliche Dienste geleistet. Ich habe es fast durchweg citirt (mit D bezeichnet), theils um meine Erkenntlichkeit für die von ihm mir erwiesene Hülfe zu bezeugen, theils aber auch, um das Nachschlagen der Wörter im Handwörterbuch zu erleichtern. Denn wenn man nicht von vornherein weiss, wie DELITZSCH ein unsicheres Wort liest, so ist es oft recht schwierig, es bei ihm aufzufinden, trotz der dankenswerthen Hinweise, mit denen er die Unzulänglichkeit der alphabetischen Anordnung auszugleichen sucht.

Eine eingehende Kritik des DELITZSCH'schen Werkes würde hier zu weit führen; es sei mir aber doch gestattet auf ein Paar Punkte aufmerksam zu machen, in denen ich von dem hochverdienten Meister der Assyriologie abweichen zu müssen glaubte. Ganz unnöthig finde ich die vielen Spaltungen der Wurzeln, die DELITZSCH vornimmt; so lassen sich z. B. die beiden *adâru* S. 28 ganz gut auf eine Grundbedeutung zurückführen; ebenso die beiden *ridû* SS. 612—14. Aber auch in anderen Fällen, bei denen der ursprüngliche Bedeutungszusammenhang nicht so klar vorliegt, möchte ich keine Spaltung vornehmen, die nicht in den Lautverhältnissen des Assyrischen selbst begründet wären. Während ich Wörter, die nachweisbar im Assyrischen dieselben Konsonanten haben, unter eine Wurzel zusammenstelle, unbekümmert um ihre anscheinend gänzlich verschiedene Grundbedeutungen, habe ich andererseits nur da verschiedene Wurzeln angenommen, wenn in den Ableitungen verschiedene Konsonanten auftraten. So habe ich drei    angesetzt, = *zarâbu*, *šarâbu*, *šarâpu*, dagegen nur ein    = *barû*. Mir scheint dieser Grundsatz den praktischen Bedürfnissen besser zu entsprechen und übersichtlicher zu sein; zweifellos ist er auch methodisch richtiger, solange wir nicht alle Wortbedeutungen genau kennen. Freilich ist auch hier noch Manches recht unsicher; z. B. die genaue Scheidung des eben angeführten   , da die Konsonanten mehrerer der Ableitungen nicht sicher bestimmbar sind. Praktisch ist dies jedoch nicht von Belang, da die einzelnen Ableitungen alle noch einmal nach der Zeichenordnung eingereiht sind, man sie also nach derselben aufsuchen kann.

Ferner scheint es mir nicht richtig, mit DELITZSCH zwei Adjektiva *êlû* anzusetzen; wenn ich auch gern zugebe, dass die Unterscheidung in einer früheren Sprachperiode bestanden haben mag, nach der Analogie von *šaplu*, *šaplû*, so sind doch in der uns bekannten Sprache die beiden Formen lautlich vollständig zusammengefallen, und der Bedeutungsunterschied ist auch nicht grösser als er sonst innerhalb eines allgemein als einheitlich angesehenes Wort vorkommen könnte. Unrichtig scheint mir auch die Ansetzung von *kanâku* als , da in allen sicheren Ableitungen — *kangu* und

kingu sind immerhin einigermaßen zweifelhaft — nur die zur Bezeichnung des 𐎶 dienenden Zeichen vorkommen. Warum DELITZSCH S. 179 zwei bunnânû ansetzt, ist mir nicht recht klar; der Eigennamen Bu-na-ni kann doch nicht ausschlaggebend sein. S. 13^b Z. 17 ist nicht MUH. DÉ, sondern U. KA. DÉ zu lesen, wie die Variante U. KA. DÉ an die Hand giebt. Das i-bal-la-rum S. 177^a (182^a) ist sicher i-pal-la-ás zu lesen; vgl. meine „List“ n^o. 12248.

Auch muss ich mein Bedauern aussprechen, dass DELITZSCH die homophonen Zeichen in der Transcription zum Theil anders bezeichnet, als es bisher üblich war; in solchen nebensächlichen Dingen sollten alle Assyriologen gleichmässig verfahren, damit die ohnehin grossen Schwierigkeiten des Keilschriftstudiums nicht unnötig vermehrt werden. Es dürfte sich vielleicht empfehlen, die Transcription auf einem internationalen Orientalisten-Congress endgültig festzusetzen.

Der zweite Index enthält eine nach der üblichen Zeichenordnung zusammengestellte Verzeichniss der einzelnen Bestandtheile der aus zwei oder mehreren Zeichen bestehenden Ideogramme. Hierbei ist jedes Ideogramm in zwei Hälften getheilt, von denen die zweite zuerst (links), die erste zuletzt (rechts) steht. Ein Stern vor dem ersten Zeichen eines Ideogrammes bedeutet, dass es im „Supplementary List“ (S. 493—516) aufzusuchen ist; ist der Stern eingeklammert, so kommt das betr. Ideogramm sowohl im „Supplementary List“ wie auch in dem Hauptverzeichniss vor. Ein Kreis vor dem ersten Zeichen der rechten Gruppe bedeutet, dass man weiter unter dem betr. Zeichen im Index selbst nachzuschlagen hat; eine Anzahl gleichlautender Gruppen sind auf diese Weise nur einmal im Index aufgeführt, wodurch eine bedeutende Raumersparniss erzielt wurde, ohne dass das Nachschlagen dadurch in erheblichen Maasse erschwert wäre. Ein eingeklammerter Kreis zeigt an, dass die betr. Gruppe sowohl im Index wie auch in der Hauptliste nachzuschlagen ist.

Zum Schluss habe ich ein Verzeichniss aller alt- und neubabylonischen und -assyrischen Zeichen gegeben, soweit ich sie bis jetzt gesammelt habe, und zwar nach einem einheitlichen System geordnet. Das Verzeichniss in CHOSSAT's „*Répertoire*“ ist nach einem anderen, weniger bequemen System geordnet, und die verschiedenen Listen der neubabylonischen Zeichen kommen hierbei nicht in Betracht. Ueber die Anordnungsweise giebt die „Erläuterung“ genügenden Aufschluss; im Allgemeinen basirt sie auf der üblichen Zeichenordnung. Ob sie für das Neuassyrische allein zweckmässiger ist als jene, wage ich nicht zu entscheiden. Meine Hauptquelle war natürlich AMIAUD-MÉCHINEAU; daneben habe ich STRASSMAIER's Verzeichniss und die Zeichentafel in AL³ benutzt, sowie auch eigene Sammlungen. Aus letzteren stammen die Zeichen ohne Citat; sie machen übrigens auf Genauigkeit keinen Anspruch. Das schwierige Werk des Ausschreibens

der Zeichen aus den genannten Werken hat mein Freund und früherer Schüler Herr Pfarrer THEODOR MAYER in Herschberg, Rhein-Pfalz in aufopfernder Weise besorgt, wofür ich ihm hier meinen aufrichtigen Dank ausspreche. Dass mir bei der Anordnung der zum Theil sehr complizirten Zeichen einige Versehen begegnet sind, bitte ich nachsichtig zu beurtheilen.

Es erübrigt mir noch der Firma E. J. BRILL in Leiden meinen warmen Dank dafür auszusprechen, dass sie mit gewohnter Liberalität die Druckkosten dieses Werkes übernommen hat.

Vevey, Neujahr 1897.

Verzeichniss der alt- und neubabylonischen
und assyrischen Zeichen.

Erläuterung.

Die Zeichen sind, wie in der gewöhnlichen Anordnung, nach ihren Anfangskeilen geordnet.
Die Grundkeile mit ihren Verdoppelungen etc. (Vermehrungen) sind folgende:

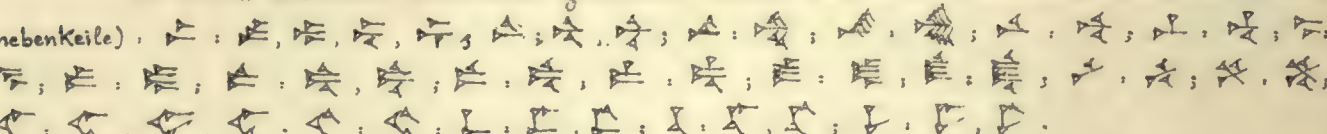

1									
2									
3									
4									

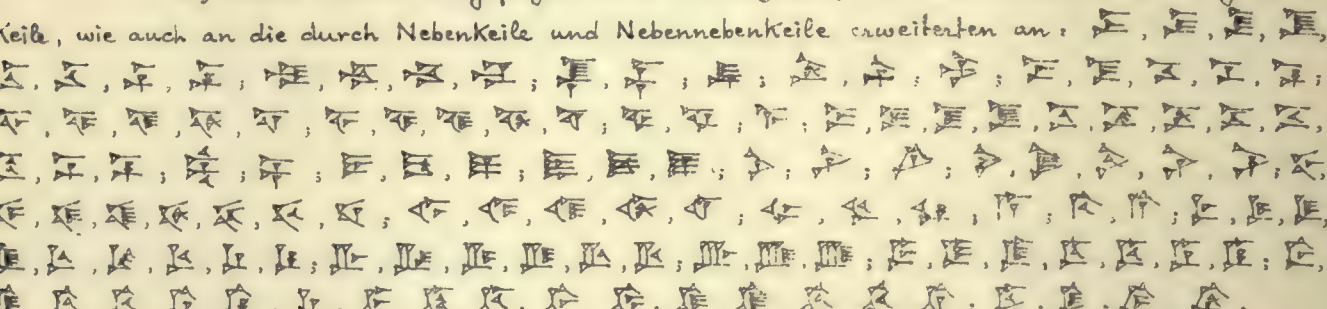

Diese Grundkeile können in verschiedenen Weisen erweitert werden:

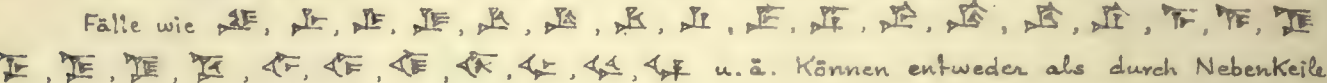

1.) Durch Kürzere, meist etwas nach rechts eingerückte Keile, die über oder unter dem einfachen Keile stehen, resp. an dessen oberem oder unterem Ende angefügt werden (Nebenkeile):

Weitere Formen sind: .

Die durch Nebenkeile erweiterten Grundkeile können noch weitere Nebenkeile annehmen (Nebennebenkeile): .

2.) Durch kleine, eingefügte Keile (Zusatzkeile); sie treten sowohl an die Grundkeile, wie auch an die durch Nebenkeile und Nebennebenkeile erweiterten an: .

Fälle wie  u.ä. können entweder als durch Nebenkeile erweiterte Grundkeile mit Zusatzkeilen betrachtet werden, oder als Grundkeile mit erweiterten Nebenkeilen. — Auch einfache Grundkeile nehmen Zusatzkeile an, wie z. B.  u.s.w.

3.) Durch Keile, die zum Theil wie die Zusatzkeile angefügt werden, aber oben oder unten, wie die Nebenkeile (Nebenzusatzkeile): sie treten sowohl an die Grundkeile, wie auch an die unter 1.) und 2.) genannten erweiterten:  u.s.w. — Zu diesen Gruppen können weitere Nebenzusatzkeilen hinzutreten:  u.s.w.

Alle die genannten Zeichen sind als Keilgruppen erster Ordnung zu betrachten; sie verbinden sich miteinander zu Keilgruppen zweiter usw. Ordnung:  u.s.w. — Einzelne Zeichen zweiter etc. Ordnung können wie Grundkeile erweitert werden:  u.s.w. — Neben der Verbindung mit  kommt auch die Durchquerung vor:  diese werden gleich vor den analogen Verbindungen eingereiht (, ); — sie können wie Grundkeile erweitert werden, z. B.: . — Auf Striche wird keine Rücksicht genommen ( also nach ).

Die Erweiterungen finden Statt durch alle Keile erster wie auch durch solche zweiter und höherer Ordnungen: z. B.  u.s.w.

Die Anordnung der Zeichen ist auf Grundlage dieser Eintheilung gemacht: bei jedem Grundkeil kommen zunächst die Verbindungen, dann die Erweiterungen in umgekehrter Folge (also Nebenzusatzkeile, Zusatzkeile, Nebenkeile), hierauf der nächstfolgende Grundkeil usw.; z. B.:

: Verbindungen: ; Nebenzusatzkeile: ; Zusatzkeile: ; Nebenkeile: ; Hauptkeil:  u.s.w.
